Summary

Final-year Computing Science student at Thompson Rivers University, looking for an entry-level IT role. Builds web apps in JavaScript and writes object-oriented C++, with software testing experience from a developer internship. Three years supervising operations in a regulated, fast-paced casino environment.

Projects

Health & Safety Incident Tracker | Capstone client project for Dawson Construction | JavaScript, HTML, CSS, Supabase

- Building a web app on a team of four for the client to record workplace health and safety incidents and track compliance
- Developing the front end in plain JavaScript, HTML and CSS, connected to a Supabase database
- Gathering requirements directly with the client and presenting design and architecture milestones

Object-Oriented Calculator | C++ | github.com/adit1606/OOPS-calculator

- Built a menu-driven basic and scientific calculator around a class hierarchy using inheritance and polymorphism
- Added input validation and error handling for invalid input, division by zero and negative square roots

Full-Stack Web Development Projects | HTML, CSS, JavaScript, PHP, MySQL, MongoDB, Node.js, AngularJS

- Built a personal website, then converted it to PHP with a contact form that saves messages to MySQL
- Created a MongoDB product catalog with schema validation and an AngularJS phone directory with search and sorting
- Built a login and registration app with Node.js, Express, MongoDB and AngularJS

Technical Skills

- **Languages:** JavaScript, C++, PHP, SQL, HTML, CSS
- **Web and databases:** Node.js, Express, AngularJS, jQuery, MySQL, MongoDB, Supabase
- **Tools:** Git and GitHub, VS Code, Visual Studio, XAMPP, Microsoft Office
- **IT foundations:** computer networks, network security, database design, software testing
- **Spoken languages:** English, Czech and Hindi (fluent); Spanish (intermediate); German and Russian (beginner)

Education

Bachelor of Computing Science | Thompson Rivers University , Kamloops, BC | Expected May 2027

- Relevant coursework: Web Development, Computer Networks, Network Security, Software Engineering, Database Systems, Software Architecture, Object-Oriented Programming (C++), Data Structures and Algorithms

High School Diploma | Moravské gymnázium, Brno, Czech Republic | 2018 – 2022

- Graduated with distinction; Bronze Certificate, Student of the Year (2022)

Experience

Table Games Supervisor & Dealer | Cascades Casino Kamloops, Kamloops, BC | Mar 2023 – Present

- Supervise floor operations as Pit Supervisor, resolving game irregularities and operational issues in real time
- Handle cash transactions accurately under strict gaming regulations
- Work with Pit Managers, Surveillance and Security teams to keep the floor safe and compliant

Assistant Software Developer Intern | TESCAN Brno s.r.o., Brno, Czech Republic | Aug 2022 – Dec 2022

- Tested software for electron microscopes and reported issues ahead of release
- Contributed to user manuals and release documentation for product launches
